My Portfolio

PROFILE

Frontend Developer with 3+ years building scalable React and Next.js applications. Specialized in complex UI systems including real-time features, drag-and-drop interfaces, and performance optimization. Proven experience delivering production-grade products across web platforms.

SKILLS

— **Core**: React, TypeScript, Next.js | **State & Data:** Redux Toolkit, TanStack Query, Zustand | **UI & Styling**: Tailwind, MUI, Shadcn ,SASS | **Other**: dnd-kit, React Native . | **Familiar**: Angular, Node.js, Firebase, Testing

WORK EXPERIENCE

Frontend Developer 03/2023 – present
Nweave Software Development Alexandria, Egypt

- Built a Slack-style internal communication system with real-time channels and direct messages, enabling team collaboration within the platform.
- Developed a Jira-style task management module with kanban boards, drag-and-drop cards, assignment, filtering, and status tracking
- Architected and delivered the frontend of a real estate platform connecting buyers, sellers, and agents across web and mobile viewports
- Integrated Google Maps API to display property locations and nearby amenities, increasing listing engagement with rich geographic context
- Built an advanced search and filtering system with 10+ filter criteria, enabling targeted property discovery
- Collaborated with backend developers to integrate RESTful APIs for real-time listings, optimistic UI updates, and seamless data sync
- Ensured full cross-device responsiveness across mobile, tablet, and desktop

Frontend Developer (React & Next) 10/2022 – 03/2023
Startup Defenders Cairo, Egypt

- Delivered multiple production features in a fast-paced startup environment using React, Next.js, and TypeScript
- Built reusable UI component libraries, reducing development time for new features by standardizing design patterns
- Participated in the full development cycle — from design handoff to testing and deployment — shipping features on tight deadlines

Frontend Developer 07/2022 – 09/2022
Self-Employed / Freelance

- Built and maintained frontend codebases for 5+ e-commerce websites using React and vanilla JavaScript
- Led bug triage and resolution across production sites, identifying and fixing 300+ issues to improve stability and UX

Frontend Developer 04/2022 – 07/2022
Internship (ITI) alexandria, egypt
Frontend and cross-platform mobile developer

PROJECTS

Real-Time Chat Application (React, Firebase, SASS)
Developed a real-time chat application with user authentication and live messaging using Firebase services. Designed and implemented a responsive chat interface with focus on usability and real-time updates.

Source Code: https://github.com/Ahmedhassanin12/Chat-App

Quran-player (React.js & redux toolkit)
Developed a responsive Quran player application with modern React architecture. Implemented global state management using Redux Toolkit and handled asynchronous data fetching efficiently. Focused on performance and clean UI rendering with Tailwind CSS.
Live Demo: https://quranplayer.vercel.app/
Source Code: https://github.com/Ahmedhassanin12/Quran-player

X-cite clone (React.js & redux)
Built a full-featured e-commerce frontend integrated with Firebase for backend services. Implemented product listing, search, cart management, and favorites functionality with persistent state using local storage. Designed dynamic UI interactions for cart updates and user actions.
Source Code: https://github.com/Ahmedhassanin12/X-Cite-User
